

flux®

catalogue autumn 2013

We are flux® We love designer furniture.
We also love things that are simple,
sustainable and flexible.

Our furniture combines all of
these things, and even comes
in easy-to-store packages. Handy.

In this catalogue you can find the complete
flux collection. Have a read; it will help you
get to know us a little better.

The flux chair. Our award-winning design.
Looks like a giant envelope;
turns into a designer chair. Simple.

One craftily cut piece of sustainable polypropylene;
eight modern colours to choose from;
zero tools necessary.

awards

selected by MoMA San Francisco
German Promotional Gift of the Year 2012
Grand Designs Product of the Year 2011
Accent on Design Award 2011
New Venture Award 2009
Philips Innovation Award 2009

Our flux pops are smart, multi-tasking little boxes of design goodness.

They can be used as designer stools or side tables and with their seven contemporary chalk-tones, they effortlessly blend into any interior.

The flux junior is the flux chair - but then for kids. It's an identical, mini version of the original flux chair.

Choose from six colours:
three that match its older sibling,
and three new, child-friendly colours.

The **flux plumo's** exciting, curvy shape is folded from a single sheet.

This highly flexible material mimics the light-effect of frosted glass, but combines it with a sustainable, small packaging and a friendly price. What's not to love?

The flux plumo is designed by Hungarian designer Farkas Pongrácz. and available in three versions.

The flux column and pillar are the first foldable high table and bar stool that really hold their own as design pieces.

They're even fully customizable and easy to light from within. More importantly, at 25 mm when folded, they're over 80% flatter than anything else out there.

flux column (high table)

flux pillar (bar stool with footrest)

weight 4,7 kg
weight limit 140 kg
material weatherproof polypropylene
colour pure white

The flux coffee is a stylish low table that matches the flux chair perfectly (or any chair for that matter).

Each table is fully customizable and easy to light from within - which makes for a great presentation platform or booth table. It's available in two sizes that both fold down to a superflat package.

The flux counter serves you perfectly as a mobile place of business. It's wide enough to address two people at the same time and it has a shelf to keep the top clutter-free.

The front pane is nice and large, which makes it the perfect spot to highlight your brand with customization.

The flux tablet tower is an elegant interactive communication console. Or simply put - a really cool way to engage your customers.

The custom foam interior can cradle tablets up to 11" in horizontal or vertical orientation. A lock at the back keeps your tablet safe.

Our flux chair cushions are designed to fit neatly into the shell of the flux chair and make a comfy seat even comfier.

And with four different colours, you can either match your cushion with your chair for a simple-but-elegant look, or mix it up with contrasting colours for a casual take on comfort.

material Acrylic cover.
Teflon treated to easily remove stains.
High quality foam (38 kg/m³).

colours

The flux wall-mount means you can store a whole bunch of chairs, juniors or pops flat against your wall. Handy.

Just fold them, hook them onto the zinc-plated wallmount, and pull the hardy polyester strap down to keep them flat. It's 21st century living all over.

Customization is a great way to make our furniture uniquely yours. From a subtle embossing to a flashy all-over print, just let your imagination run wild.

Embossing

A very stylish way of customizing is embossing. We engrave your logo on the inside of the product. The result is subtly visible on the outside, like a shadow. When the piece is lit up from within - easily done with our LED-eggs - the logo and the foldlines light up.

Embossable products: column, pillar, coffee small & big

Printing

The beauty of making products that can be folded flat, is that you can easily print on them. You just have to find a very large printer (which we did).

We use super high quality full colour UV resistant fantastic turbo ink, so no worries in that area. Just see our furniture as your own curvy, 3-dimensional blank canvas.
