Experience The Vista

With Vista System, you get what is expected from a leading international sign manufacturer.

Availability of service through thousands of sign professionals worldwide.

MCFT - Modular Curved Frame Technology: A modular system with the ability to provide highly customisable solutions that meet the unique requirements of each sign project.

A modern, contemporary clean look.

Simple to use and easy to update by yourself.

Maximizing modularity with a wide range of sizes.

Comprehensive solution with an unrivalled range of applications that cover the entire project for a competitive price.

High quality, 100% guaranteed product.

20UK-PH3

We hope you will enjoy our new guidebook, and find it useful and convenient.

As you may have noticed, we often mention in our literature that we operate according to the U&I business method. The U&I method was developed by us with a specific goal and is our promise to the market.

We strive to continually provide an "Unbelievable & Incredible" experience to our clients with everything we do.

Sounds overstated? Well, we mean it! We realise that our customers expect their service to improve and not decline. We also understand that's exactly what gets us excited about being in business in the first place. The challenge of discovering just how far we can go to impress you, to excite and surprise you and to improve your well being as a result of doing business with us. Focusing on this goal requires our team to constantly work hard on improving, creating and generating new ideas as to how we can improve your well - being. This type of focus and purpose generates a positive atmosphere amongst our company and makes it a great place to be.

We invite you to join our excitement!

MCFT
Modular Curved Frame Technology

20UK-PH4

MCFT is a new concept in the sign industry. MCFT was developed by experienced sign professionals with a goal to fill the gap between bespoke sign systems and modular sign systems. MCFT offers the best of both worlds by providing the consumer with all the advantages of a modern modular system, while at the same time, providing a custom solution for the unique requirements of each project. The result, a modular system with a custom fabricated look and capabilities.

MCFT offers flexibility when it comes to budgeting, by offering the ability to adjust the cost according to the level of customisation.

What makes an MCFT system?

Modular
Standard units that can be assembled in different ways using both standard and custom accessories and attachments.

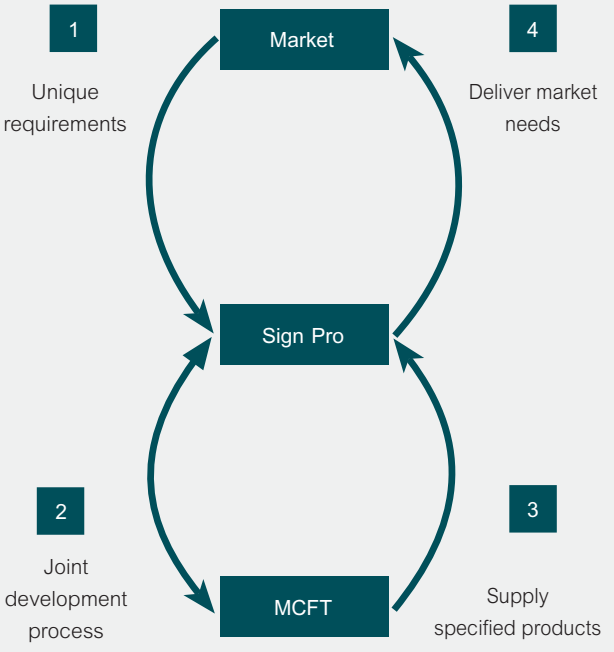
Curved
Today's design trend and a curved shape that keeps the insert material in place by using its own tension.

Frame
Enabling the use of many types of sign substrates and inserts providing for easy and inexpensive updating of the signs.

Technology
With MCFT, the sign-pro participates in the design and development of new ideas for new products and becomes an integral part of the development process jointly with Vista System by providing new ideas from the field that mirror market needs. These demands are supported by the quick fabrication capabilities of custom accessories and attachments that mesh with the system extrusions.

MCFT - Market position and advantages	Custom	Modular	MCFT
Create signs with a modern curved shape.	✓	✓	✓
Fast delivery.	–	✓	✓
Can be used with many kinds of sign methods such as: engraving, screen printing, vinyl, photopolymer, Braille and tactile, digital printing, etc.	✓	–	✓
Wide range of applications that cover the entire signage project.	✓	✓	✓
Can be used with many kinds of standard sign substrates such as: Plastics, metals, paper, laminates, veneers, etc.	✓	–	✓
Easily update; low cost to update the information without the need of a professional on site.	✓	✓	✓
Dismantles easily for efficient shipping.	✓	✓	✓
Cost efficient!	✓	✓	✓

Custom Components and MCFT



Vista System Advantages

20UK-PH5

Sign frame:

Vista System was originally designed as a sign frame holder for a wide range of applications. This gives Vista System a huge advantage over other sign systems. The system is designed to handle most applications and materials used in the sign industry. This includes printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, photo-luminescent safety signs, tactile, and more. The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista System frames.

Easy to adopt:

This means that Vista System is the easiest system for sign companies to adopt. There is no need to develop new technologies, but simply to incorporate existing technologies into the system.

A wide range of sizes:

Vista System is the only system featuring more than 80 different extrusions, creating unlimited widths and shapes. This is more than five times the number of widths offered by any other MCFT system currently available. This wide choice of sizes and shapes allows the customer to stick to one sign system throughout a project, and to find solutions to almost any kind of sign required.

Solutions and applications:

Vista System offers comprehensive solutions for suspended signs, flag signs, main directory signs, double sided pylons, triangle pylons, post signs, personal table signs, and many more. No other curved system can offer such a comprehensive solution.

End caps:

The metal end caps are made of aluminium with silver or black anodised finishes and includes stainless steel screws. The metal end caps are made of aluminium with silver or black anodise finishes and includes stainless steel screws.

Screw bosses for structural purposes:

Vista System offers a revolutionary solution for attaching and installing signs with no need for the welding and/or building of metal construction for support. A system of massive channels (Screw Bosses) for screws are inside the extrusion itself, enabling the construction of an enormous selection of elements, within minutes and with out any welding or special tools.

Separation strips:

Vista System offers an integrated system, which allows a sign to be divided into separate changeable slats within one sign.

Guarantee:

Vista System is sold only under the brand name “Vista”, only to the sign trade. Working this way assures sign makers that Vista System will not compete with them and that the project is done by professionals.

Wall Signs

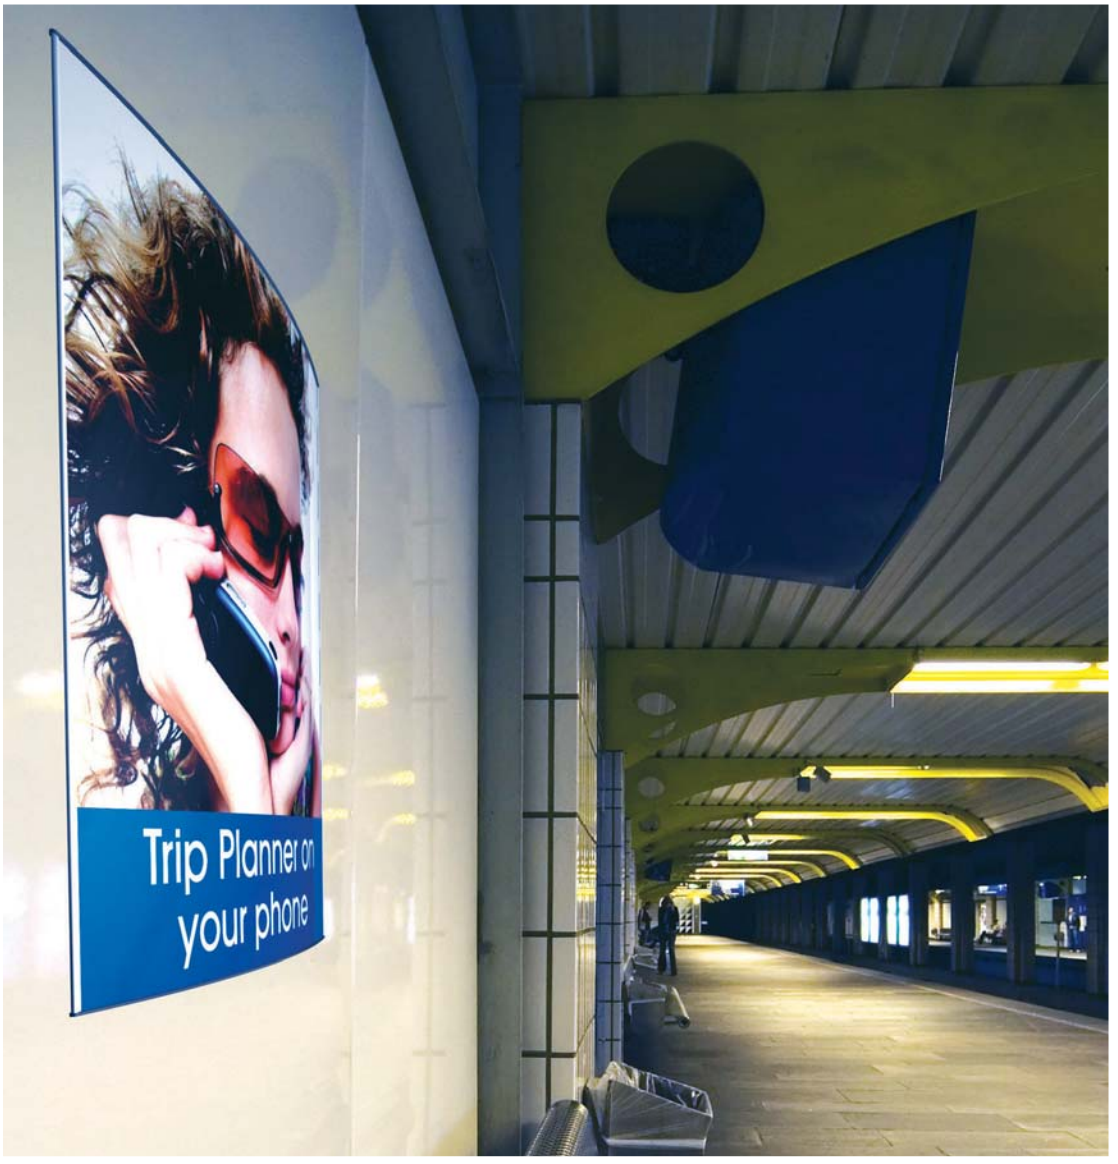
Create wall-mounted signs with the Vista frame extrusions using any flat, flexible substrate to produce a curved-face sign.

Substrates:

Paper + lens, engraving plastics, thin metals, laminates.

Compatible methods:

Cut vinyl, digitally printed vinyl, engraving, screen-printing and Braille and tactile.



20UK-PH6

Extrusion assemblies:

Available from 30mm/1.18” to 1200mm/48” wide.

Plastic end caps: Grey or black, up to V300 excluding V11.

Metal end caps: Brushed silver or black from V60 and up.

Fabric Pin-Mount: A self-adhesive sign holder for Vista signs to be installed on fabric surfaces.

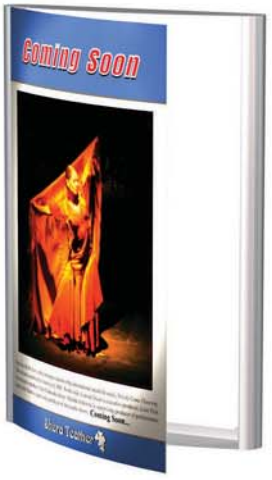
Vista Light Wall Signs

The Vista Light used with or without lighting, provides the option to sandwich the graphics between a white translucent diffuser and a clear matte lens, both made from vandal proof polycarbonate.

Vista System frames are a perfect solution for posters, and provide POP advertising with enhanced visibility and beauty, thanks to the curved design of the frames. The option of backlit or standard wall frames provides an endless variety of sizes to match any project.



20UK-PH13A

20UK-PH13

Standard finishes for Vista profiles are available in silver or black anodise.
Choose between black plastic end caps or silver and black anodised aluminium end caps finishes.
Custom sizes and finishes are available upon request.

Projecting Signs

The wall brackets are designed to accept standard size extrusions.
The base is designed to mount on the wall using countersunk screws. The bracket fits on to the base and is secured with decorative nuts. Signs that project more than 100mm/4” into the path of travel, should be mounted at least 2M/80” from the floor.
Choose between standard steel and deluxe aluminum brackets.
Finish: Black powder coat.

20UK-PH16

20UK-PH16A

Simple Base

The simple base style projecting frames are similar to small pylon signs designed to be mounted flush to the wall. They are attractively priced and provide a clean, streamlined appearance. The simple base design can also be used as an overhead sign mounted to the ceiling.

Directories

Vista System directories are fast, easy and simple to assemble and install. There is no need for special tools. The system has the advantage of flexibility to accept a variety of insert materials as well as the complete freedom to determine the height of each information strip, you decide how the sign will be sectioned by placing the separation strips as needed. Where? Wherever you decide, according to your design.

Directories

Vista System directory signs are easy to maintain and update.
The advantages of this simple system are flexibility when it comes to the overall width of the sign and the ability to add additional panels. It offers a perfect choice, since its' innovative design allows for easy installation, removal and replacement of the signage, even by a novice. Vista's wide-ranging system of contemporary curved framed technology is a key factor in the purchasing process.

Double Sided Pylons

The system will accept a variety of standard inserts/substrates, including: paper, plastic, metal, laminates, sublimations, etc…
By adding Vista System divider strips, the towers can function as directories with changeable inserts.

20UK-PH32

Great for directories, show rooms, lobbies and displays in many environments, including car parks, airports, hospitals, office buildings, campuses, libraries and more!

Available in two basic designs:

The slim design is offered in 13 different widths from 150mm/6” to 600mm/24”, and can be ordered in various heights to accommodate a wide range of applications.
Bases are available for both permanent and portable applications.

Double Sided Pylons

Vista system offers a range of bases and end caps that utilise the built in screw bosses allowing all sign holders to be assembled using only a screwdriver.
This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination.

A wide range of sizes can be fabricated by expanding the extrusions to fit the standard bases and end caps.

The wide design is offered in 19 different widths from 150mm/6” to 1200mm/48” and can be ordered in various heights to accommodate a wide range of applications.
Bases are available for both permanent and portable applications.

V400

Triangular Pylons

Create freestanding, convex triangular pylons using the standard Vista extrusions joined with a series of matching end caps and bases.

This cost effective frame system allows the use of standard substrates such as: plastics, metals, and paper. Create your own graphic signs and then flex and pop them in! When it's time to change the graphics, just pop them out again with the Vista Key suction cup.
The clear, non-glare lens provided by Vista can be used as a substrate for your vinyl graphics, or placed over printed paper inserts (paper should only be used indoors).

20UK-PH50

Bases are available for both permanent and portable applications.

Samples And Display Kits For The Sign Pro

Why Samples and Display Kits?
Professional sales tools are one of the key factors in promoting your business. At Vista System, we have made a special effort to create sales sample kits to fit both your needs and budget. From our experience the most effective sales tool for Vista System is a display of actual signs presented in your business display area.
The display kits offered come with changable inserts, ready for you to provide the graphics of your choice.
We encourage you to experiment with different types of inserts to create an interesting and versatile display.

C8 - Display Panel

Showroom Display Board:
An attractive assortment of 8 Vista signs mounted on display board, ready to mount in your show room or lobby. This kit will enable you to show Vista System to your potential customers and add value to your current display area.

Promo - Promotional Kit

100 customised samples to hand out to your customers, including the Vista suction tool. The samples are made of V80x3.14”/80mm or V100X 2.36"/60mm and include personalized graphics to include your company logo and information. There is a detailed label on the back of the sample with your company contact information. This is a great way to market and promote your company, with a practical and useful marketing tool that you leave with potential customers as a calling card.
